AGENTS.md

Read

AGENTS.md see boilerplates and plan the frameworks that are needed. Add gitignore and bobignore and env example file

### ⚡ Used skill create-plan

Let me start by exploring the codebase to understand what's here before planning.

🔍 Check for existing AGENTS.md and AI ru...

Explored 2 folders, 3 files : 4s >

Now I have a clear picture of the project. Let me read a couple more boilerplate files to understand the full pattern, and check for any existing config files.
